## **Background**

The National Farm Chemical User Training Program was introduced in 1990 by the, National Farmers Federation and the Rural Training Council of Australia. Their aim was to ensure that users of both plant and animal protection chemicals achieved established National Industry Competencies to enable the correct handling and accurate application of Farm Chemicals.

The present Chemcert course is an extension of this and is a co-operative venture between NSW Farmers Association, Rural Training Council, NSW TAFE, NSW Agriculture and Charles Sturt University and was first held in June of 1992.

The course, which is provided by industry professionals, recognises that registration and labelling of chemicals can minimise problems, however these safeguards ultimately depend upon the correct handling, efficient and accurate application of Agricultural Chemicals to ensure maximum safety to the applicator and environment.

The Farmcare Course is a workshop that offers essential training in the purchase, handling, application and disposal of Agricultural and Veterinary chemicals to ensure a safe and healthy working environment for all those in and associated with the industry.

Participants who pass the Course will not only receive a Certificate of Accreditation, which is nationally recognised, and have their name placed on a statewide register of accredited Farm Chemical users. You will also, as competent operators, benefit from reduced costs by the effective and efficient use of pesticides and their impact on the environment.

The course is available to anyone with an interest in making their workplace and the environment a safer place to be in. Assistance can be provided for those with low literacy or English language skills.

## **Course Outlines**

Topics covered include:

- Integrated Weed & Pest Management Strategies.
- Legislation.
- The Product Label.
- Formulations.
- Personal Safety.
- Environmental Safety.
- Application Methods and Equipment Selection.
- Operation and Calibration of Equipment.
- Equipment Cleaning, Decontamination and maintenance.
- Safe Use of Veterinary Chemicals.
- Record Keeping.
- Discussion and Review.

## **Assessment**

Participants will be assessed during the course and will be marked as either competent or not yet competent.

**DEMAND FOR THIS COURSE IS HIGH, GET YOUR RSVP'S IN ASAP.  
IF YOU APPLY CHEMICALS AND PESTICIDES IN NSW, YOU MUST HAVE  
THIS ACCREDITATION - EPA REGULATIONS.**

**Assessment tasks include:**

- Completion of a Storage and Safety Worksheet

[This cost includes Training Course notes. You will need to bring your own pen/pencil.]

Group rates can be negotiated.

**Tea, Coffee and Lunch will be provided.**

**About the Provider**

The workshops are presented by Dan Austin. Dan is a dedicated professional weed agronomist and accredited trainer with over 18 years experience in the Agricultural Chemical and application Industry. Dan holds a Diploma in Horticulture from Riverina– Murray Institute of Higher Education (Wagga Ag College) is an Accredited Workplace Assessor, qualified Pest Control Operator and has a certificate in Bush Regeneration and is a past President of the Weed Society of NSW. Over the years Dan has conducted courses, spoken at and organised conferences and seminars for private industry and the Weed Society and is dedicated to improving the level of safety, efficiency and professionalism of the industry as a whole.

Please contact Dan Austin if you wish to undertake any of these courses.
